PROFESSIONAL SUMMARY

Senior Frontend Engineer with 3+ years building enterprise-scale Angular Single Page Applications (SPAs) for ERP, SaaS, and e-commerce products. Specializes in the reusable foundations teams build on: config-driven form and data-grid engines, real-time SignalR/WebSocket messaging, and RxJS state management, now serving 30+ modules and 350+ components in production. Delivers high-performance, responsive UI and clean, maintainable TypeScript following SOLID principles in Agile/Scrum and CI/CD environments.

EXPERIENCE

Trio Services

Oct 2025 – Present

Front-End Software Engineer

Cairo, EGYPT

- Architected the ERP platform's shared UI foundation from scratch: a config-driven **Form Builder** (25 control types with custom validators) and a **Table Builder** data-grid, now powering 30+ modules and 350+ components.
- Engineered a **real-time notification system** using SignalR (WebSockets), RxJS, and Angular NgZone-tuned change detection, replacing HTTP polling with instant push delivery under high-frequency events.
- Built a dynamic **Custom Fields** engine that lets each client define their own data fields at runtime, rendered generically across every module with no per-tenant code.
- **Refactored** legacy modules and the build pipeline: rebuilt bulk Excel import with column-level validation and duplicate detection, and scoped per-configuration bundle budgets to hold builds within performance targets.
- Delivered core ERP modules (HRM, Payroll, Finance, Invoicing, Ledger) bilingual in English/Arabic with full RTL (3,000+ keys) across 46 lazy-loaded routes, covered by Jasmine/Karma unit tests and Azure DevOps code reviews.

Maxim Investment Group

Feb 2025 – Oct 2025

Front-End Software Engineer

Cairo, EGYPT

- Led the modernization of legacy SaaS platforms to **Angular v19**, upgrading build tooling and refactoring the codebase into a modular, reusable component architecture.
- Delivered an enterprise-scale reservation and CRM SPA for high-end venues, translating complex booking workflows into responsive, high-performance UI components.

Etmana

May 2024 – Feb 2025

Front-End Software Engineer

Cairo, EGYPT

- Integrated the **GoWit** ad-serving platform via REST APIs to display sponsored products across the storefront, unlocking a new advertising revenue channel.
- Developed the core reusable, scalable UI component library behind the 'Etmana Community' feature, and refactored legacy SASS/SCSS into a maintainable mobile-first system with consistent cross-browser behavior.

General House Service

Jan 2022 – May 2024

Front-End Software Engineer

Cairo, EGYPT

- Built a real-time live-tracking SPA, integrating Firebase Realtime Database and Google Maps REST APIs for continuous location updates.
- Designed and delivered the company's in-house Front-End diploma, mentoring graduates on Angular, TypeScript, and clean-code practices.

TECHNICAL SKILLS

Languages & Styling: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, Responsive Web Design

Frameworks & Libraries: Angular (up to v19), Angular CLI, RxJS, Reactive Forms, Angular Material, PrimeNG, Bootstrap, Tailwind CSS, Chart.js

State & APIs: NgRx (Redux pattern), RxJS Observables, REST APIs, WebSockets (SignalR), GraphQL, Firebase

Architecture & Performance: Reusable Component Design, SOLID Principles, Clean Code, Lazy Loading, Change Detection Optimization, Cross-Browser Compatibility, i18n & RTL (EN/AR)

Testing & Delivery: Jasmine, Karma, Jest, Unit Testing, ESLint, TDD, Code Reviews, Git, Azure DevOps, CI/CD Pipelines, Jira, Agile/Scrum, Webpack, npm

EDUCATION

Cairo University

Bachelor of Computer Science and Artificial Intelligence

Giza, EGY

Oct 2017 – Oct 2021
